Professional Summary

Software Development Engineer with hands-on experience building AI-powered and full-stack web applications using React.js, Next.js, Node.js, Express.js, MongoDB, and REST APIs. Skilled in performance optimization, API integration, responsive UI development, and scalable application design.

Education

PSN College of Engineering and Technology

Sep 2023 – May 2027

Bachelor of Engineering in Computer Science and Engineering

Tirunelveli, Tamilnadu

Experience

Tetron Infotech

April 2025 – May 2025

Software Engineer Intern

Sivaganga, Tamilnadu

- Engineered a MERN stack-based journal publishing platform with 15+ REST API endpoints, enabling seamless journal submission, document management, and online accessibility.
- Resolved 15 critical backend issues by optimizing API communication and frontend-backend integration, improving system performance by 40% during peak usage.
- Built responsive React.js interfaces and Boosted document upload workflows, achieving 95+ Lighthouse Performance and SEO scores while enhancing application efficiency and user experience.
- Collaborated with a 4-member development team using Git and Agile practices to deliver project milestones on schedule.

Projects

AI-Powered Customer Support Chatbot | *Next.js, Tailwind, MongoDB, Node.js,*

Feb 2026 - Mar 2026

[Live Demo](#) [GitHub](#)

- Built "Nexora AI Chatbot," an AI-powered customer support platform integrating 10+ REST API endpoints to deliver real-time query handling and 24/7 automated website assistance.
- Optimized API communication and frontend rendering, reducing page load time by 35% and achieving a Lighthouse Performance score of 100.
- Developed reusable React.js components with responsive Tailwind CSS layouts, improving accessibility across desktop, tablet, and mobile devices.
- Automated customer query handling using AI, reducing manual support effort and improving response consistency.

Customizable AI Virtual Voice Assistant | *React.js, MongoDB, Express.js, Gemini API* **Jul 2025 - Aug 2025**

[Live Demo](#) [GitHub](#)

- Created a customizable AI Virtual Voice Assistant supporting real-time voice interaction, personalized assistants, and integration with 5+ AI-powered features using the Gemini API.
- Fine-tuned speech processing and AI response handling, reducing response latency by 30% and achieving 95+ Lighthouse Performance scores for faster and smoother voice interactions.
- Refactored secure JWT authentication, Cloudinary avatar management, and 10+ REST API endpoints to ensure scalable, reliable, and personalized application functionality.
- Integrated secure authentication and avatar management to deliver seamless and personalized AI-assisted voice interaction.

Technical Skills

Languages: JavaScript, C++, SQL

Frontend: HTML5, CSS3, React.js, Tailwind CSS, Next.js

Backend: Node.js, Express.js

Database: MongoDB, MySQL

Developer Tools: VS Code, Git, GitHub, Postman, Cloudinary, Vercel, Render

Technologies: MERN Stack, REST APIs, JWT Authentication, Gemini API

Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
