Education

PSN College of Engineering and Technology

Bachelor of Engineering in Computer Science and Engineering

Sep 2023 – May 2027

Tirunelveli, Tamilnadu

Experience

Tetron Infotech

Software Engineer Intern

April 2025 – May 2025

Sivaganga, Tamilnadu

- Developed a MERN stack-based journal publishing platform with 15+ REST API endpoints, enabling seamless journal submission, document management, and online accessibility.
- Resolved 15 critical backend issues by optimizing API communication and frontend-backend integration, improving system performance by 40% during peak usage.
- Delivered responsive React.js interfaces and Boosted document upload workflows, achieving 95+ Lighthouse Performance and SEO scores while enhancing application efficiency and user experience.
- Collaborated with a 4-member development team using Git and Agile practices to deliver project milestones on schedule.

Projects

React Virtual UI | *React.js, Vite, Tailwind CSS, Node.js, Express.js, MongoDB*

April 2026 - Jul 2026

[Live Demo](#) [GitHub](#)

- Engineered an AI-powered SaaS platform integrating 10+ REST APIs to transform natural language into reusable React components, reducing repetitive UI development.
- Architected secure authentication, payment processing, and AI credit management by integrating Google OAuth, JWT, Razorpay, and an admin dashboard across 6+ modules.
- Enhanced client-side performance with React.js and Vite, achieving a 92 Lighthouse score, 1.7s LCP, 70ms TBT, and 0 CLS.
- Streamlined developer workflows by automating npm publishing and semantic versioning for one-click deployment of AI-generated React component libraries.

AI-Powered Customer Support Chatbot | *Next.js, Tailwind, MongoDB, Node.js,*

Dec 2025 - Mar 2026

[Live Demo](#) [GitHub](#)

- Built "Nexora AI Chatbot," an intelligent customer support platform integrating 10+ REST API endpoints to deliver real-time query handling and 24/7 automated website assistance.
- Optimized API communication and frontend rendering, reducing page load time by 35% and achieving a Lighthouse Performance score of 100.
- Designed reusable React.js components with responsive Tailwind CSS layouts, improving accessibility across desktop, tablet, and mobile devices.
- Automated customer query handling using AI, reducing manual support effort and improving response consistency.

Technical Skills

Languages: JavaScript, C++, SQL.

Frontend: HTML5, CSS3, React.js, Tailwind CSS, Next.js

Backend: Node.js, Express.js

Database: MongoDB, MySQL.

Technological Tools: VS Code, Git, GitHub, Postman, Cloudinary, Vercel, Firebase, Scalekit.

Technologies: MERN Stack, REST APIs, JWT Authentication, Gemini API.

Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks.
