Education

PSN College of Engineering and Technology

Bachelor of Engineering in Computer Science and Engineering

Sep 2023 – May 2027

Tirunelveli, Tamilnadu

Experience

Tetron Infotech

Software Engineer Intern

April 2025 – May 2025

Sivaganga, Tamilnadu

- Engineered a MERN stack-based journal publishing website during a one-month Software Development Internship, where the team faced issues with API integration and document upload functionality that affected application performance and user experience.
- Contributed to frontend and backend development using React.js, Node.js, Express.js, and MongoDB by debugging backend routes, improving frontend-backend connectivity, and implementing responsive UI and document upload features.
- Improved application stability and user experience by ensuring smoother journal document management while gaining practical experience in full-stack web development and collaborative teamwork.

Projects

AI-Powered Customer Support Chatbot | *Next Js, Tailwind, Mongo DB, Node JS,*

February 2026

[Live Demo](#) [Github](#)

- Faced the real-world challenge of businesses struggling to provide instant and efficient customer support, which inspired the development of “Nexora AI Chatbot,” a customizable AI-powered chatbot platform for handling real-time customer queries and support.
- Challenges related to chatbot response accuracy and API communication during development affected user interaction and overall system performance.
- Improved the system by debugging integration issues, optimizing knowledge base handling, and refining chatbot response flow, helping businesses provide instant 24/7 customer support, reduce manual response time, and improve customer engagement.

Customizable AI Virtual Voice Assistant | *React, Mongo DB, Express JS, Gemini API*

July 2025

[Live Demo](#) [Github](#)

- Observed the growing need for personalized and intelligent voice-based interaction systems, which led to the development of a customizable Virtual Voice Assistant that enables users to interact with AI using real-time voice commands, personalized avatars, and custom assistant names.
- Encountered issues with voice recognition accuracy, AI response handling, and secure media storage integration during development, which affected response flow and user interaction experience.
- Improved the system by optimizing speech processing, refining AI response generation, and implementing secure authentication and avatar management, helping users experience seamless voice-based interaction with personalized AI assistance.

Technical Skills

Languages: JavaScript, C++, SQL

Frontend: HTML5, CSS3, React.js, Tailwind CSS, Next.js

Backend: Node.js, Express.js

Database: MongoDB, MySQL

Developer Tools: VS Code, Git, GitHub, Postman, Cloudinary

Technologies: MERN Stack, REST APIs, JWT Authentication, Gemini API
